www.masterylearningfolders.com.au

## Training Flashcard

## What type of animal is a cheetah?

www.masterylearningfolders.com.au

Training Flashcard
When do you have to take turns?

www.masterylearningfolders.com.au

These training flashcards will help you and your child get used to the Mastery Learning Folder process. They're designed so that some answers your child will know and others they won't, to demonstrate the process.
Step 1. Click on the QR code to watch the short video demo.
Step 2. Cut out the flashcards and spread them across the green pockets in the folder. Start testing your child from the Tutor Test pocket. If the flashcard is correct it goes to up to the first blue Rest pocket up the top. Next, go backwards to the green Rest pocket. Move these resting flashcards forward to the next pocket without testing them. Move backwards to the next green Test pocket. If a flashcard is correct, move it forwards to the next pocket, if it's incorrect, return it to the same pocket and explain the answer. Move backwards to the next Test pocket and repeat. Move backwards to the final Test pocket and repeat. That's the end of your first practise session. Well done!
